SAFE COMMUNITIES PROGRAM

The "Safe Communities" is a Digital Community Partnership, empowering communities to increase civic engagement, trust, and local government responsiveness by leveraging digital platforms. SMART community personal and public safety experts will guide the communities in assessing and forming community-based and community-wide digital Community Safety Plans and Engagement.

Why Digital Safety for Communities?

The "SAFE COMMUNITIES" program guides community stakeholders, including local government, to help the community leverage digital platforms to increase civic engagement and trust as well as become more responsive to citizen's needs.

Who Should Be Involved?

Every community is different, but there is a similar set of stakeholders who should be considered when forming the Digital Community Partnership:

- Emergency Management
- Law Enforcement
- First Responders
- Educational Institutions
- Government Agencies
- Chambers
- Enterprises

Goals of the Program

Getting communities aware and motivated to leverage digital platforms to increase personal and public safety, resilience, trust and civic engagement. Through the Digital Safety for Communities training program, communities become equipped to:

- Establish Digital Safety Partnerships
- Assess current Safety Plans
- Discuss importance of Personal and Public Safety
- Design, implement and operationalize a community-wide Digital Safety engagement plan.

Training

- Safety Plan assessment
- Digital Safety Plan design and implementation
- Community engagement

Topics may include:

- Personal Safety
- Public Safety
- School Safety
- IoT/IIoT Security
- Threat Intelligence
- Network and Endpoint Security
- Mobile Security
- Cloud Security
- Behavioral Detection
- Deception Security
- Risk Remediation
- Continuous Network Visibility
- Quantum Encryption
- Website Security
- Blockchain Security
- Consumer Protection
- Digital Trust
- Cyber Insurance
- Cyber Law

Results

By the end of the training program, you have formed a local Digital Safety Partnership, gained Personal Safety and Public Safety Awareness, drafted a Community-based and Community-wide Safety Assessment and Digital Safety Plan – ready for implementation and community engagement. We guide your community partners through each step of this process.
