SMART Communities USA 2020

Communities across the U.S. can participate in SMART initiatives to implement and execute SMART projects and to develop a SMART workforce. In a SMART community, citizens take central stage. Considering their potential and including the residents in the SMART process is the most efficient way to create a better quality of life for everyone using SMART technology as a tool.

WHO WE ARE

SMART Community Exchange (SCE) offers communities the opportunity to prepare their community for Investment through community assessments, workforce training programs and educational programs in a variety of potential projects. The themes include but are not limited to: SMART inclusive solutions for citizens, SMART Education, SMART public safety & security, SMART open social communication, SMART energy for communities, and SMART government

This information is delivered through our SMART Education Exchange (SEE) cloud-based AI empowered platform.

The SMART community development program is managed by the SMART Community Exchange (SCE) in cooperation with local government agencies, educational institutions, and investors and SMART solution providers.

WHAT WE DO

SMART Community Planning and Preparedness

The opportunities and challenges for communities in the era of fast technological progress and changes in the natural environment are vast. SMART Community Exchange offers the critical information you need to make informed investment, business planning proposals for investors.

OUR PROGRAMS

- SMART COMMUNITY ASSESSMENTS
- SMART LEARNING ENVIRONMENTS
- ARTIFICIAL INTELLIGENCE
- MACHINE LEARNING
- IMPLEMENTATION WORKSHOPS
- SMART SAFETY
- CYBERSECURITY
- SMART WORKFORCE TRAINING
- SMART TEACHER TRAINING

SMART Community Assessments

WE introduce you to simple and comprehensive community and school assessments to create a community blueprint for identifying potential SMART community projects. Our implementation workshops help communities learn how to identify and implement the right solutions in the right way to ensure community success.

SMART Implementation Workshops

We will provide a complete program for implementation of assessments, training, support and engagement for communities. We can provide the programs live in communities that are exploring SMART investment programs or for communities that have already started their SMART development projects. The programs are customized for your community and can be either live or digital. We provide the expert speakers, the complete program to meet your learning/business objectives.

SMART Safety & Security S3

The SMART Safe Communities initiative brings training programs to show communities how to implement SMART Safety and Security (S3) for Public Places - Schools, First Responders, Community Buildings, Healthcare facilities and Places of Worship. The SMART Safe Communities projects will offer opportunities for community leaders and solution providers to meet and exchange critical information, implement and execute S3 projects.

SMART Communities need a SMART Workforce

We offer access to digital community resources that offer new educational and business services for residents. SMART offers unique opportunities for local economic development - providing residents and business access to SMART skills development, lifelong learning, and a way to active citizenship.

Innovation in Education - SMART Teacher Training

The success of a community is directly related to the success of the schools. The health of the school system is directly related to a healthy economic development for the community. Future employers require schools that can provide 21t century learning and a safe learning environment. We provide educator access to 21st century professional development programs to help them stay current with innovation in education - trends in education, identifying and integrating education technology in the classroom, e-gaming for the classroom and building education culture.

WHAT YOU CAN IMPLEMENT TODAY

Because our programs are digital, cloud-based learning programs, the platform can be implemented immediately in a community to either help prepare for investment or to enhance the long-term success of existing SMART projects.

HOW TO CONNECT

We are currently scheduling program in communities across the United States. If you would like to invite SMART Community Exchange to share an implementation workshop or assessment workshop in your community, please contact us.
